

There's a lot of sameness out there, but if you're an individual, you need a university that treats you like one

UNE - a University with a difference

UNE offers you an education that's truly world class. State-of-the-art teaching and research facilities, sporting amenities and vibrant residences mean that you have at your disposal everything that you need.

The University of New England was the first Australian university established outside a capital city. With a history extending back to the 1930s, UNE has a well-earned reputation as one of Australia's great teaching, training and research universities.

While UNE has a long history and strong tradition, our outlook is dynamic and fresh. Our focus is on the future, ensuring that your education and qualifications are relevant. More than 75,000 people now hold UNE qualifications; many hold senior positions in Australia and overseas. At UNE you will experience a personal education that will set you apart.

A learning experience that's personalised for you

At UNE, we offer flexible learning methods to suit your needs. Choose to study either full time or part time; on campus, by distance, or a combination of both. UNE ensures that whichever way you choose to study, you get the very best tuition.

Studying on campus means you will be immersed in a vibrant living and learning environment - a community where you will make lifelong friendships. We have smaller class sizes, an open door philosophy and the kind of campus where you'll actually want to spend time. Not to mention highly qualified teachers who come from all corners of the globe. This on campus environment ensures that you'll get an education that's as unique as you are.

Distance education allows you to tailor your studies to suit your life. We keep in contact with you via a range of communication channels and support you with online technology and a vast array of reference material. UNE is at the forefront of distance education. We are successful because we understand the challenges of being a distance education student. So no matter how far away you are, you'll never feel distant.

Why study Sustainability at UNE?

The Bachelor of Sustainability is about understanding social sustainability and human issues, as well as ecologically sustainable development and environmental concerns. UNE is the only university in Australia that offers the degree, which provides a unique opportunity to develop skills and an understanding of sustainability in a holistic manner, integrating social science with environmental science. If you are interested in saving the world, as well as enjoying an exciting rewarding career that will make a difference, then this degree is for you.

Bachelor of Sustainability

Study Mode	On Campus/Distance
Duration	Full Time: 3 years Part Time: 6 years
2010 ATAR/OP	New in 2011

You will study a diverse range of subjects as part of the Bachelor of Sustainability including environmental management, geography, law, psychology, economics and policy.

The degree focuses on the three 'Rs':

- Resilience - ecological, social and personal resilience and the capacity to withstand, mitigate and adapt to change.
- Relationships - interdependency and our relationships with others and to the environment.
- Reflection - critical self-reflection at the personal level, as well as critical reflection of our society and social institutions.

Graduates will be equipped with the ability to understand the complexities of the environmental and social problems which beset our society, as well as the problem-solving abilities needed to build a sustainable future. These skills are being increasingly sought after by employers.

Career opportunities

The Bachelor of Sustainability is designed for you to pursue a career in the growing 'green collar' sector of the employment market.

Graduates can look forward to an exciting career in a broad range of areas, ranging from the corporate sector to government agencies, non-governmental organisations, private consultancies and overseas aid.

Areas of employment could include:

- Environmental conservation
- Environmental protection agencies
- Cultural and natural heritage management
- Land and water management
- Community development
- Environmental consultancy
- Natural resource management
- Policy and Planning
- Research and development

Need more information?
