

ipad iphone wireless network settings

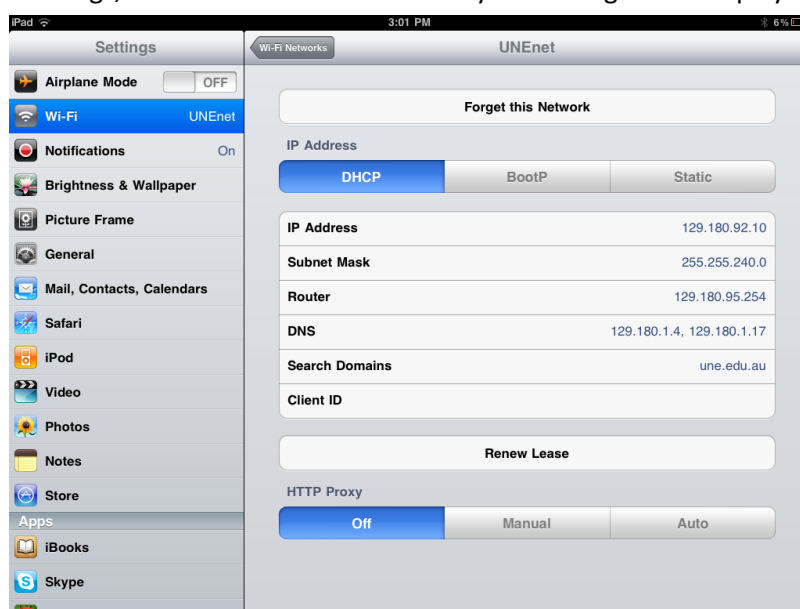

Staff connecting devices to the UNEnet wireless network are no longer required to use proxy settings to access websites outside of the UNE network.

ITD is trialing for a 6 month period removing the requirement for proxy settings to connect to external websites for Students.

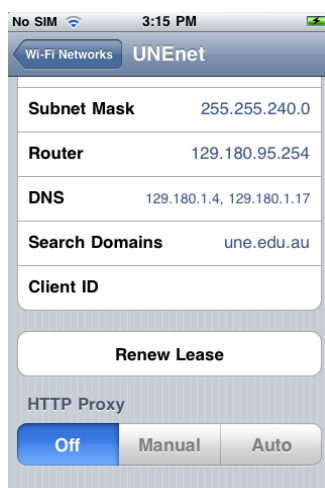

To check that your iphone and ipad is setup not to use proxy settings please follow the instructions below.

IPAD

Select Settings, WiFi and then UNEnet check your setting are as displayed.

IPHONE

Select Settings, WiFi and then UNEnet check your setting are as displayed.

Please contact the IT servicedesk email: servicedesk@une.edu.au, phone: x5000 if you require any assistance in checking these settings
