

Plant, Soil & Environment Systems Seminar Series

When: 12 - 1pm Wednesday, March 16th

Where: **W83/Zoom** Meeting ID: **821 6316 3696** Passcode: **267652**

AGSS New Academic Introduction

Dr. Onoriode Coast

Biography

Coast is a Lecturer in Crop Science, following on from research positions at CSIRO, the Australian National University and University of Greenwich. He is an Associate Editor of Plant-Environment Interactions and on the consultant roster of the CGIAR Advisory Services as a Subject Matter Expert in resilient agri-food systems. Coast researches abiotic stress tolerance in cereals with a focus on fundamental physiological processes (photosynthesis and respiration), and how these influence crop yield and quality. He is also interested in horticultural crop production, controlled environment cropping systems, and improving resource use efficiencies on farms.
