

Plant, Soil & Environment Systems Seminar Series

When: **1 - 2pm Wednesday, June 22nd**

Where: **Wright Lecture Theatre, Zoom**

Meeting ID: **894 2152 5218** Passcode: **922259**

Fixing broken subsoils: increasing the water available to plants from hostile soil

Chris Guppy, Richard Flavel, Craig Birchall

Biography

Chris, Richard and Craig have been working with a large team of scientists across the northern grains region attempting to increase productivity from paddocks where either compaction, sodicity or salinity in the subsoil has reduced yield. They have been managing 3 field sites across central and northern NSW with amendments ranging from simple deep ripping to gypsum, organic matter and elemental S additions at depth. The results of those interventions will be presented and discussed and theorising about the way forward undertaken...
