

Plant, Soil & Environment Systems Seminar Series

When: 1 - 2pm Wednesday, May 25th

Where: Wright Lecture Theatre

Meeting ID: 837 3430 5934 Passcode: 746531

A Reconnaissance Survey of Alpine Humus Soils in Kosciuszko National Park

Dr. Ivanah Oliver

Biography

Ivanah is a lecturer in the agronomy and soil science discipline at UNE, where she specialises in soil formation and classification. Ivanah joined UNE in 2015 when she commenced a PhD seeking to understand how the quantity, spatial distribution and stability of root carbon inputs influence the soil organic carbon pool.

During her PhD Ivanah also completed an APR internship with the NSW Department of Planning and Environment, where she surveyed the Alpine Humus Soils of the Kosciuszko National Park. Join us as Ivanah discusses the findings of this research project.
