

Call for Sessions: Institute of Australian Geographers Annual Conference, University of New England, Armidale, 5-8 July 2022

Session Title: IAG Film Shorts 2022

Abstract: Geographers are increasingly embracing film-making as part of their research practice. Building on the inaugural IAG Film Shorts event held during the 2021 Annual Conference, we invite submissions of short films to be screened at this year's IAG Short Films session. With this screening event, we hope to celebrate the art of geographical film and continue to contribute to conversations about film-making amongst geographers in Australia and beyond. Films made by geographers from around the world with a running time of 30 mins or less are eligible. *To watch the 2021 program go to:*
