

WHS F029 Job Safety Analysis (JSA)

Title	Nitrogen (N2) glo	ve box	
School/Business Unit	School of Environmental and Rural Science	Location (building/lab/ workshop if applicable)	Growth cabinet room in W23

JSA Development Date	13.06.2017	JSA Development	Samieh Eskandari
JSA Review Date		Team	Chris Guppy
	1		Matt Tighe

Relevant Australian Standards / Codes of Practice / Legislation

• AS4332-2004: The storage and handling of gases in cylinders

Relevant Safety Data Sheets (can be obtained via UNE subscription to ChemWatch)

•

Plant & Equipment Required

 Ventilated environment, acrylic glass box with a side opening lid, exhaust to outside

Licenses Required

None

Competencies Required

Training and practicing

PPE Required

	Dust Mask	Face Shield	Foot Protection	Hair Net	Protective Clothing	Respirator	Sun Protection	Breathing Apparatus
Compulsory			х					
As needed						· Carrier and

WHS F029 Job Safety Analysis (JSA)

Job Steps				
Job Step	Potential Hazards	Risk Score*	Controls	Residual Risk*
Checking the gas cylinder to be stable in its place	Falling to worker's foot	5	Secure the gases cylinder in its place	3
Open the exhaust valve	Breaking or even exploding the cylinder, valve's or box because of Increasing pressure inside the box by increasing N ₂ release into the box	5	appropriate sequencing of valves and making sure the whole thing is secure	3
Turn on the N₂ gas	It may cause valves to pop out and increase the risk of exposure to high N2. It can even break/explode the cylinder, valve's or box	5	Open the exhaust valve first, and keep the appropriate sequencing of the valves. Monitoring of pressure via the pressure gauge, as well as O ₂ in the box, Considering a large space, appropriate external venting, monitoring the pressure valve and very limited time using the N ₂ . Using safety glasses, to combat any breakages or valve's popping out, as well as periodical checks by a manager when the experiments are being conducted	3
Turn off the N ₂ gas Close the exhaust valve	May break the box- if it is closed before turning off the gas	5	keep the appropriate sequencing of the valves	3

^{*} The risk score and residual risk is determined by following steps 1-4 below.

STEP 1				STEP 2					
Determine	e likelihoo	d of occurren	ce	Determine	severity/co	onsequence/cos	st		
Risk Scor	re Calcula	tor: Definition	of Terms						
Rare		o occur here on onal circumstar		Insignificant	1.00	No personal injury; and/or No adverse media attention; and/or Financial cost under \$2000			
Unlikely	Could o	ccur here at so	me time	Minor		Minor personal injury (first aid treatment); and Local Media Coverage; and/or Cost \$2000-\$5			
Possible	May occur here at some time			Moderate	Adve	Serious personal injury (medical treatment); and/or Adverse Capital City Media Coverage; and/or Cost \$50,000-\$250,000			
Likely		bably occur he ed before)	re (has	Major	Adve	Serious Personal Injury/long term absence; and/or Adverse & Extended National media Coverage; and/or Cost \$250,000 - \$1m			
Almost Certain		cted to occur he cumstances	ere in	Catastrophi		Fatality(ies)/ long term impairment; and/or Government intervention; and/or Financial cost more than \$1million			
STEP 3: D	Determine	Risk Score

WHS OP006

1.1

WHS F029 Job Safety Analysis (JSA)

9-10	Severe risk. Highest of priorities. Must be rectified immediately.							
8	Very high risk. Requires urgent attention for quick resolution. Temporary controls to be implemented.							
6-7	Moderate to high risk. Prompt planning and resolution required with consultation.							
4-5	Low to moderate risk. Consult and identify controls that are reasonably practicable							
3	Very low risk. Minor issue for monitoring							
2	Insignificant Risk							
STEP 5: Imp	lement the Highest Control Possible							
Hierarchy of	Controls							
Eliminate the	hazard							
Substitute the	e hazard with something safer							
Isolate the ha	izard from people							
Introduce eng	gineering controls							
Implement ac	Iministrative controls							
Use Persona	Protective Equipment (PPE)

Records Storage Instructions

All completed JSAs are to be recorded in TRIM Container A16/3851 utilising a TRIM license in your School/Business Unit. Only the HR Team is able to view records in this container. Completed JSAs are to be published on Safety Hub for ongoing utilisation.
